MAKING MOMENTS SINCE 1920

A brand with a long history is celebrating its centenary in 2020. GIZEH has been offering enjoyment and diversity for every taste for 100 years.

With the foundation of the first GIZEH factory in Cologne in 1920, the company demonstrated its remarkable intuition for key trends. Self-rolled cigarettes were the first choice for everyone seeking cost-conscious enjoyment. Even in those days, the name GIZEH was already essential to the brand's success. At the time, the Egyptian world and its symbols stood for a yearning for freedom, sensuality and imagination. The logo with the sphinx and pyramids symbolised the mysteries of the Orient, which fascinated many consumers.

After the Second World War, the entire production was relocated to Gummersbach, having suffered severe damage in Cologne. This is where the next phase began, a time of construction when GIZEH became part of the post-war Wirtschaftswunder or economic miracle.

Rolling with papers was quite naturally one of the typical pleasures enjoyed during the post-war years.

As new consumer habits developed, GIZEH continuously expanded its product range with new papers, rolling filters, filter tubes and accessories, developing numerous innovations that have established themselves very successfully on the market.

We have been winning over consumers with our quality and variety to this day. This is the aspiration with which the company has become a successful brand in over 80 countries around the world. Having begun in 1920, even after 100 years, GIZEH has preserved a tradition of making special moments time after time.

Rolling Papers

ICON DETAILS

 **MAGNET SEAL** Reclosable booklet with magnetic seal. Both packaging and magnet can be fully recycled.

 **CELLULOSE** Papers made from cellulose. Our cellulose is extracted from trees produced by forest thinning, making it especially environmentally friendly.

 **FLAX HEMP** Papers made from a mixture of hemp and flax fibres. Both are annual plants and thus renewable raw materials.

 **HEMP CELLULOSE** Papers made from a mixture of hemp fibres and cellulose. The cellulose is extracted from trees produced by forest thinning, making it especially environmentally friendly.

 **ORGANIC HEMP** Papers made from fibres of 100 % certified organic hemp. Hemp is an annual plant providing renewable raw materials.

 **DEXTRIN** Gum made from dextrin. Dextrin is a foodstuff extracted from starch. The gum sticks immediately when the paper is pressed together.

 **ARABIC GUM** Gum strip of Gum Arabic. Gum Arabic is made from acacia resin. It takes a moment to develop its full adhesive strength.

 **CUT CORNERS** Cut Corners make it easier to roll the paper.

 **WATERMARK** Embossed marking of the paper carried out during its manufacture.

 **SLOW BURNIG** Burning characteristics: The paper goes out when the roll-up is not smoked.

 **MEDIUM BURNIG** Burning characteristics: The paper burns slowly, but rarely goes out completely.

 **REGULAR BURNIG** Burning characteristics: The paper burns evenly and does not go out.

PRODUCT CHARACTERISTICS

 Basis weight (g/m²) of the paper: The lower the weight per square metre, the thinner the paper.

Making Moments
SINCE 1920

FILTERS MANY THINGS BUT KEEPS ALL THE ENJOYMENT!

GIZEH Active Filters 6 mm

GIZEH Active Filters have been specially developed for King Size enjoyment. The purified activated charcoal inside the filter is produced using coconut shells. Thanks to the high-quality ceramic caps on both ends, the filters can be filled from both sides. With seven perforations each, they ensure perfect drawing resistance.

GIZEH Active Filters 8 mm

The ideal size for optimum enjoyment. With a diameter of 8 mm, GIZEH Active Filters offer a particularly balanced taste while reducing unwanted harmful substances. This is ensured by a natural activated charcoal granulate and two filter caps made of high-quality ceramic which achieve optimal swirl effects and perfect drawing conditions. The filters can be used multiple times. They can also be used in (pure) pipes or traditional tobacco pipes.

Filter Tubes

ICON DETAILS

MENTHOL FILTER Filter with menthol flavor.

AIR PLUS® FILTER Filter with laser perforation applied by a special process. The perforation allows more air to be drawn through, providing a fine, well-balanced flavor.

CHARCOAL Filter with activated charcoal chamber. Ensures a milder tobacco aroma.

WHITE FILTER TIP Filter with elegant white filter tip.

EXTRA FILTER Longer filter (25 mm). Saves approx. 10 % tobacco and ensures a well-balanced flavor.

COMPACT SIZE Longer filter and thinner filter tube in comparison with standard filter tubes. Tobacco saving up to 25 %.

CLIQ FILTER Filter tube with an aroma capsule inside. By crushing the capsule, the refreshing flavor will be released into the filter.

FRESH TASTE Fresh mint-flavor in a capsule, which can be activated – if desired – by crushing the capsule inside the filter.

PRODUCT CHARACTERISTICS

Length of the tobacco filling space. Our Extra and Standard Filter Tubes have a total length of 84 mm. The difference is in the length of the tobacco filling space. This symbol indicates the length of the filling space of the tube in mm.

Length of the filter in mm. Extra Tubes have a longer filter than Standard Tubes. Also see Tobacco filling space.

MAKE YOUR OWN

ICON GUIDE

MAKE YOUR OWN

It's the filter that makes all the difference

Our Make Your Own filling products are listed on the following pages. The broad range caters for many different tastes and preferences. Each of our premium filter tubes is made from high-quality materials. Alongside classic filter tubes, the numerous variations also include specialities such as filter tubes with activated charcoal filters or filters with a menthol aroma.

"Make Your Own" is the latest trend. For those who prefer to make their own, GIZEH brand filter tubes offer two major benefits: individual taste and a great price.

With the variety of GIZEH tubes and your favourite tobacco, you can create countless varieties to suit your own personal taste, whether you prefer a full or fresh flavor, a natural fragrance or a mild tobacco aroma. And because sometimes less is more, GIZEH filter tubes mean that you even save tobacco!
